

# Respiratory Illness Report - Week ending December 30, 2023

Published January 05, 2024

## Overview

**Influenza:** Statewide influenza-like illness (ILI) and hospitalization rates are both in moderate severity. In Davis County, current ILI rates are classified as low severity.

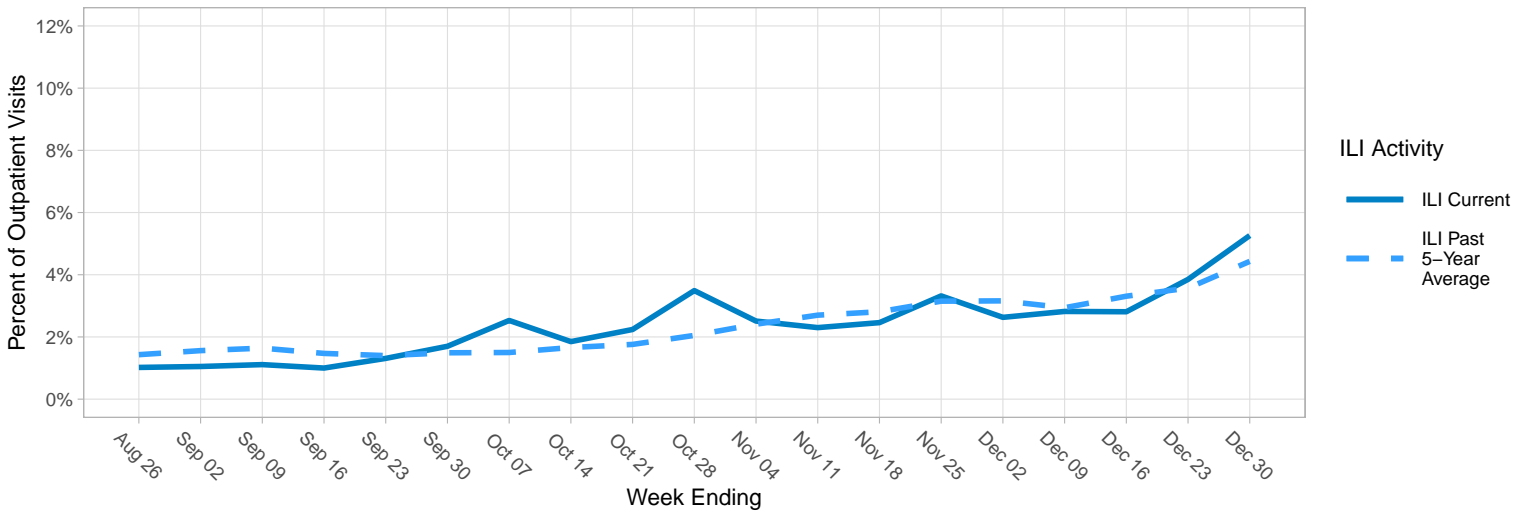

**COVID-19 Wastewater Surveillance:** As of December 28, overall statewide viral concentrations in wastewater remain high, with all 34 sites (100%) in the Elevated category. In Davis County, all four sites are in the Elevated category. However, the Central Davis site (Farmington/Kaysville/Fruit Heights area) has decreasing trends.

A public dashboard is available to explore statewide wastewater surveillance data. Visit <https://avrpublic.dhhs.utah.gov/uwss/>.

## Influenza-Like Illness

Graph 1 displays the weekly percentage of outpatient visits due to influenza-like illness (ILI). For comparison, the dashed line shows the previous 5-year average (2018-2022) of ILI activity. This week's ILI rate was 5.3%.

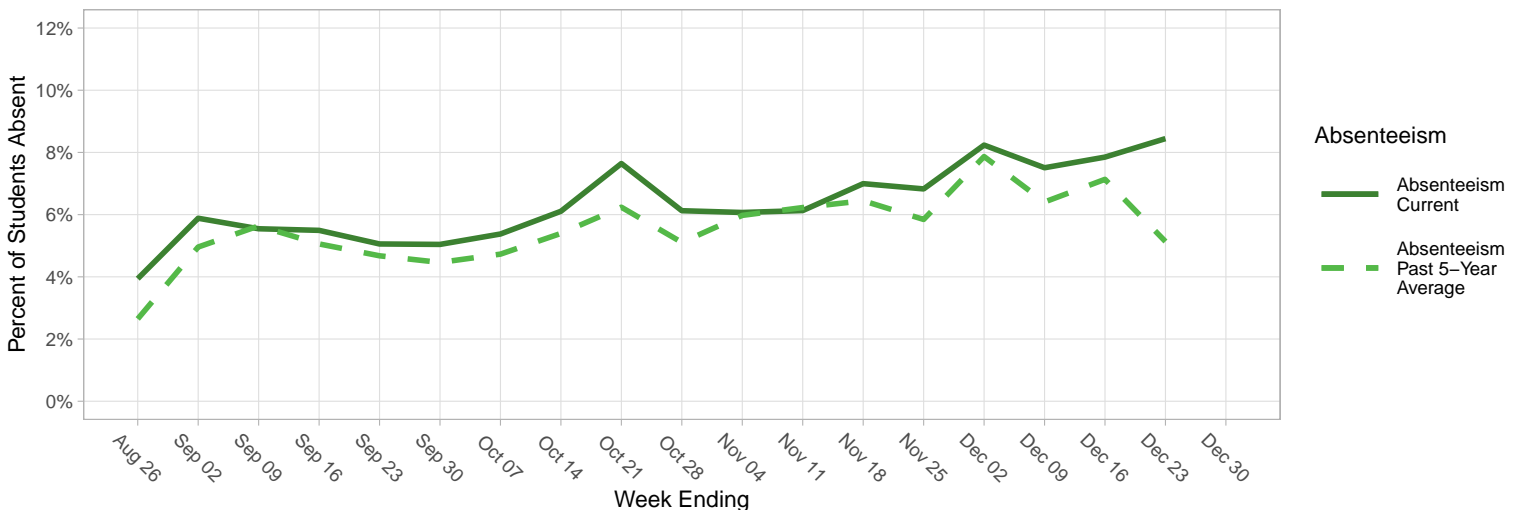

Graph 1. Percent of Outpatient Visits due to Influenza-Like Illness, by Week, Davis County, Utah

## School Absenteeism

Graph 2 displays the weekly percentage of elementary school absenteeism in Davis School District. For comparison, the dashed line shows the absenteeism rate of the previous 5 school years (school years beginning 2018-2022).

Graph 2. Percentage of Elementary School Absenteeism, by Week, Davis School District, Utah

# Emergency Department Visits

Graph 3 displays the rolling 7 day average of the percent of emergency department (ED) visits due to COVID-19, influenza, and respiratory syncytial virus (RSV). These data are obtained from syndromic surveillance and only consider the diagnosis discharge codes for each condition. Table 1 presents two data points for each virus: the current trend of ED visits (increasing, decreasing, or no change), and the percent of ED visits due to each during the currently reported week.

Graph 3. Percent of ED Visits due to COVID-19, Influenza, & RSV, Rolling 7-day Average, Davis County, Utah

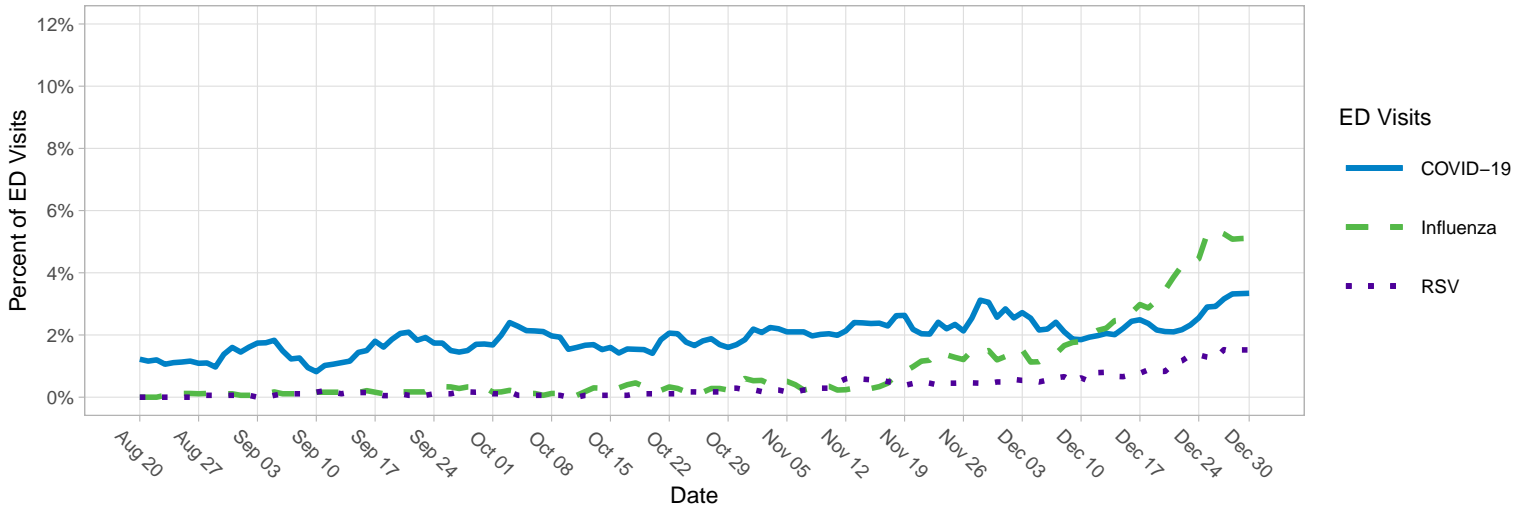

Table 1: Recent Trends of ED Visits, Davis County, Utah, for Week Ending Dec 30, 2023

Virus	Trend	Percent of ED Visits
COVID-19	Increasing (last 14 days)	3.3 %
Influenza	Increasing (last 14 days)	5.1 %
RSV	Increasing (last 14 days)	1.5 %

# Hospitalizations

Graph 4 displays the weekly number of hospitalizations due to COVID-19 and influenza.
