

UTAH REPORTABLE DISEASES

Davis County Health Department Disease Reporting Line

Phone: (801) 525-5220

Fax: (801) 525-5210

DISEASE REPORTING RULE

Utah law requires prompt disease reporting under the Communicable Disease Rule R386-702, adopted under the authority of Sections 26-1-30, 26-6-3, and 26-23b to interrupt disease transmission, locate and provide prophylaxis or treatment to exposed contacts, identify and contain outbreaks, ensure effective treatment and follow-up of cases, and alert the medical community. All reports required by rule are confidential and are not open to public inspection. Nothing in this rule, however, precludes the discussion of case information with the attending physician or public health workers. A release of information is not required to provide public health workers with patient information.

Diseases requiring **immediate** reporting should be telephoned to the Davis County Health Department Disease Reporting Line at (801)525-5220. The disease reporting line is available 24/7. Non-urgent disease reports may be telephoned to the disease reporting line or faxed to (801)525-5210.

For questions about disease reporting, please contact Sarah Willardson at (801)525-5206 or swillardson@co.davis.ut.us.

Revised March 2018

*Laboratories shall submit clinical material to the Utah Public Health Laboratory for all cases identified with these organisms, or any organism implicated in an outbreak when instructed by authorized local or state health department staff.

†Full panel susceptibility results, including minimum inhibitory concentration and results suppressed to the ordering clinician, are reportable when performed on the following organisms.

REPORT IMMEDIATELY

- **Anthrax*** (*Bacillus anthracis*)
- **Botulism*** (*Clostridium botulinum*)
- **Cholera** (*Vibrio cholerae*)
- **Diphtheria*** (*Corynebacterium diphtheriae*)
- **Haemophilus influenzae***, invasive disease
- **Hepatitis A**
- **Influenza infection, non-seasonal strain***
- **Measles*** (Rubeola virus)
- **Meningococcal disease*** (*Neisseria meningitidis*)
- **Plague*** (*Yersinia pestis*)
- **Poliomyelitis**, paralytic and non-paralytic
- **Rabies** (human and animal)
- **Rubella** (excluding congenital syndrome)
- **Severe Acute Respiratory Syndrome (SARS)**
- **Smallpox** (Variola virus)
- **Staphylococcus aureus***, with resistance (VRSA) to vancomycin isolated from any site
- **Transmissible spongiform encephalopathies (prion diseases), including Creutzfeldt-Jakob disease**
- **Tuberculosis***† (*Mycobacterium tuberculosis*)
- **Tularemia*** (*Francisella tularensis*)
- **Typhoid***, cases and carriers
- **Viral hemorrhagic fevers**, including Ebola, Lassa, Marburg, and Nipah virus-related illnesses
- **Unusual Diseases or Outbreaks of any kind and any exposure/infection that may indicate a bioterrorism event**

REPORT WITHIN THREE (3) DAYS

- **Acute flaccid myelitis (AFM)**
- **Adverse event resulting after smallpox vaccination** (Vaccinia virus)
- **Anaplasmosis** (*Anaplasma phagocytophilum*)
- **Arbovirus infection**, including Chikungunya, West Nile virus*, and Zika virus*
- **Babesiosis** (*Babesia*)
- **Botulism, infant*** (*Clostridium botulinum*)
- **Brucellosis*** (*Brucella* species)
- **Campylobacteriosis*** (*Campylobacter*)
- **Candida auris or haemulonii from any body site***†
- **Carbapenem-resistant or carbapenemase-producing Acinetobacter species, Enterobacter species, Escherichia coli, and Klebsiella species***†
- **Chagas disease**
- **Chancroid** (*Haemophilus ducreyi*)
- **Chickenpox** (Varicella-zoster virus)
- **Chlamydia trachomatis infection**
- **Coccidioidomycosis** (*Coccidioides*)
- **Colorado tick fever**
- **Cryptosporidiosis** (*Cryptosporidium*)
- **Cyclosporiasis** (*Cyclospora cayetanensis*)
- **Dengue fever**
- **Ehrlichiosis** (*Ehrlichia*)
- **Encephalitis or meningitis** (bacterial, fungal, parasitic, protozoan and viral)
- **Giardiasis** (*Giardia lamblia*)
- **Gonorrhea**, (*Neisseria gonorrhoeae*) sexually transmitted & ophthalmia neonatorum†
- **Hantavirus infection** (Sin Nombre virus)
- **Hemolytic Uremic Syndrome**, post-diarrheal
- **Hepatitis, viral**, including hepatitis B (acute, chronic, and perinatal), C (acute, chronic, perinatal), D, and E
- **Human immunodeficiency virus (HIV) infection**, including perinatal and AIDS diagnosis
- **Influenza-associated hospitalization***
- **Influenza-associated death in a person less than 18 years of age**
- **Legionellosis*** (*Legionella*)
- **Leprosy** (Hansen's Disease)
- **Leptospirosis** (*Leptospira*)
- **Listeriosis*** (*Listeria monocytogenes*)
- **Lyme disease** (*Borrelia burgdorferi*)
- **Malaria** (*Plasmodium*)
- **Mumps**
- **Mycobacteria other than tuberculosis**
- **Pertussis** (*Bordetella pertussis*)
- **Pregnancy associated with a Hepatitis B, Hepatitis C, HIV, Listeria, Rubella, Syphilis, or Zika virus infection**
- **Psittacosis** (*Chlamydophila psittaci*)
- **Q Fever** (*Coxiella burnetii*)
- **Relapsing fever, tick-borne or louse-borne** (*Borrelia*)
- **Rubella**, including congenital syndrome
- **Salmonellosis***† (*Salmonella*)
- **Shiga toxin-producing Escherichia coli (STEC) infection***
- **Shigellosis***† (*Shigella*)
- **Spotted fever rickettsioses, including Rocky Mountain spotted fever** (*Rickettsia*)
- **Streptococcal disease, invasive, due to Streptococcus pneumoniae† and Groups A and B**
- **Syphilis**, all stages, congenital and syphilitic stillbirths
- **Tetanus** (*Clostridium tetani*)
- **Toxic-Shock Syndrome**, staphylococcal or streptococcal
- **Trichinellosis** (*Trichinella*)
- **Vibriosis*** (*Vibrio*), including Cholera

ELECTRONIC LABORATORY REPORTING (ELR)

Entities reporting via ELR have additional reporting requirements not listed on this document. Those requirements can be found under the "Information for Reporters" tab at <http://health.utah.gov/epi/reporting> or by contacting the Utah Department of Health at elr@utah.gov.
