

Respiratory Illness Report - Week ending November 1, 2025

Published November 06, 2025

Overview

Influenza: In Utah, influenza-associated hospitalizations and influenza-like illness (ILI) are both categorized as low severity. In Davis County, ILI activity is minimal.

COVID-19 Wastewater Surveillance: As of October 28, overall statewide viral concentrations of SARS-CoV-2 in wastewater remain generally low: two sites are elevated (5.7%), six sites are low (17.1%), and the remaining 27 are very low (77.1%). In Davis County, the South Davis – South site (North Salt Lake area) is elevated. The remaining three sites are all very low. Explore statewide wastewater surveillance data and trends at <https://avrpublish.dhhs.utah.gov/uwss/>.

Influenza-Like Illness

Graph 1 displays the weekly percentage of outpatient visits due to influenza-like illness (ILI). For comparison, the dashed line shows the previous 5-year average (2020-2024) of ILI activity. This week's ILI rate was 0.4%.

Graph 1. Percent of Outpatient Visits due to Influenza-Like Illness, by Week, Davis County, Utah

School Absenteeism

Graph 2 displays the weekly percentage of elementary school absenteeism in Davis School District. For comparison, the dashed line shows the absenteeism rate of the previous 5 school years (school years beginning 2020-2024). This week's absenteeism rate was 4.4%.

Graph 2. Percentage of Elementary School Absenteeism, by Week, Davis School District, Utah

Emergency Department Visits

Graph 3 displays the rolling 7 day average of the percent of emergency department (ED) visits due to COVID-19, influenza, and respiratory syncytial virus (RSV). These data are obtained from syndromic surveillance and only consider the diagnosis discharge codes for each condition. Table 1 presents two data points for each virus: the current trend of ED visits (increasing, decreasing, or no change), and the percent of ED visits due to each during the currently reported week.

Table 1: Recent Trends of ED Visits, Davis County, Utah, for Week Ending Nov 01, 2025

Virus	Trend	Percent of All ED Visits
COVID-19	Increasing (last 14 days)	0.4 %
Influenza	Increasing (last 14 days)	0.2 %
RSV	Plateau/no trend (last 14 days)	0 %

Hospitalizations

Graph 4 displays the weekly rate of hospitalizations per 100,000 people due to COVID-19 and influenza.
