

TAKE & MAKE – ORIGAMI FROG KIT

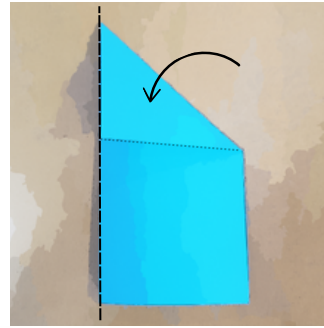

Requires one piece of origami paper

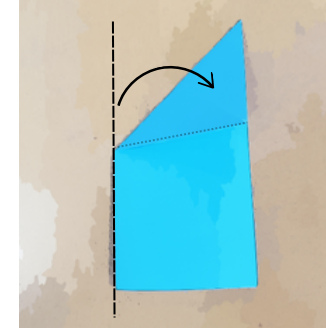

1. Start with a square piece of paper laying face down.

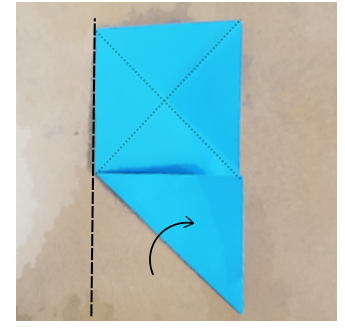

2. Fold the paper in half vertically and crease.

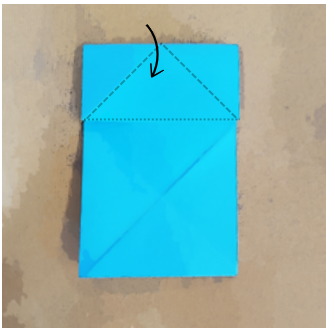

3. Take the top right corner of the model and bring it to the side, creasing it diagonally. Unfold.

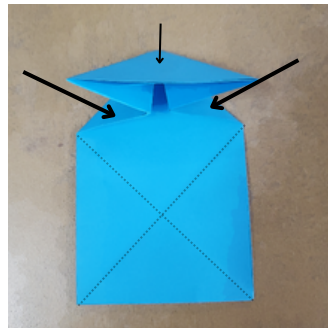

4. Repeat step 3 on the top left corner. Unfold.

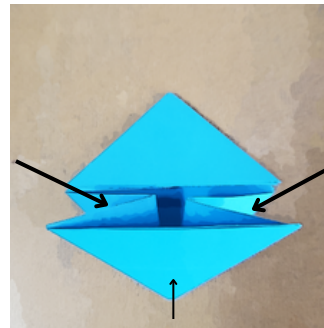

5. Repeat steps 3 and 4 on the bottom half of the model. Unfold.

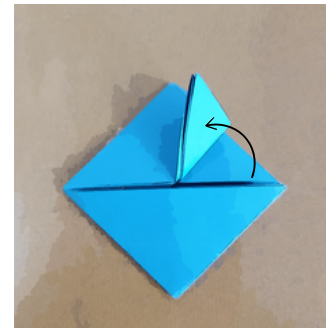

6. Fold the top edge of the model down and crease horizontally so that the fold crosses the X shape created by the previous steps.

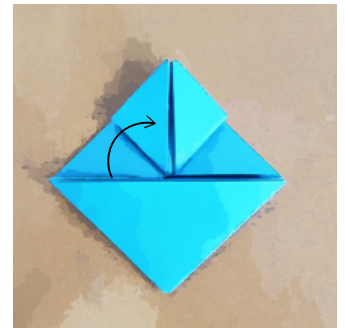

7. Bring the left and right edges in towards the center, flattening the top half of the model into a triangle.

9. Repeat steps 6 and 7 on the bottom half of the model.

10. Take the top right flap of the model and bring it upwards, creasing in half.

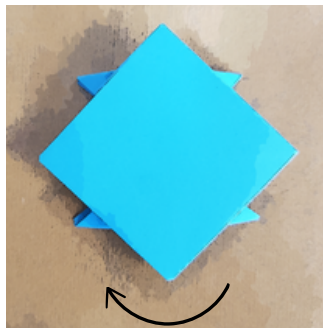

11. Repeat step 10 on the top left flap.

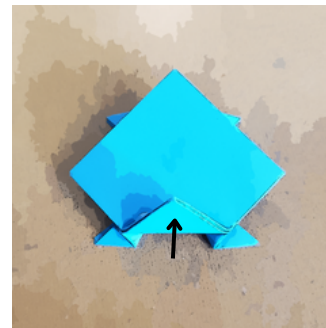

12. Take the top right and left flaps and fold them outwards, creasing in half.

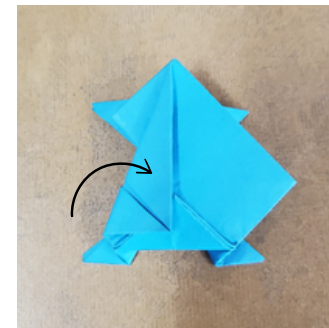

13. Repeat steps 10-12 on the bottom half of the model.

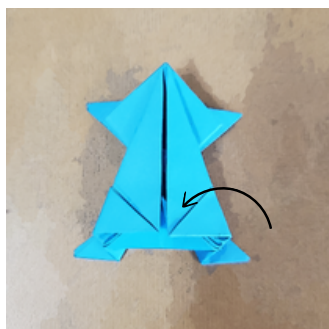

14. Flip the model over.

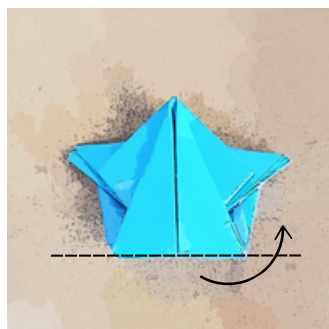

15. Take the bottom corner and fold upwards.

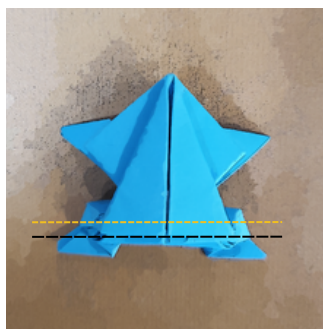

16. Take the left corner of the model and bring it in to the middle. Crease it in half diagonally.

17. Repeat step 16 on the right side of the model.

18. Fold the bottom half of the model underneath as pictured and crease in half horizontally.

19. Bring the bottom flap from the last step back out from underneath the model, creating a second horizontal fold just below the first one on the yellow line.

20. Push down on the star and release to make the frog hop.

Tip:

If the frog doesn't jump correctly, narrow the space between the folds created in steps 18 and 19.
