Instructions

1. Cut out around the square and around the head piece.
2. Fold the paper in half diagonally so the face shows on one side.
3. Place the triangle so both sides of the face are down and the center point faces away from you.
4. Take the left side point and bring it up to match the center point; fold.
5. Take the right side point and bring it up to match the center point; fold.
6. You should now be able to see the face; unfold the face.
7. At the center point there are now two sheets of paper, grab the top sheet center point and fold it down to match the center point of the fold you just made.
8. Refold both sides of the faces (the left and right points) and tuck them behind.
9. Now, glue the head piece on to your animal.
