

Respiratory Illness Report - Week ending December 9, 2023

Published December 15, 2023

Overview

Influenza: Statewide influenza severity is currently low, though influenza activity continues to increase. In Davis County, current influenza-like illness activity is classified as minimal.

COVID-19 Wastewater Surveillance: As of December 7, overall statewide viral concentrations in wastewater remain high, with 29 sites (85.3%) in the Elevated Category (same as last week). In Davis County, all four sites are in the Elevated category. One of these sites, South Davis – South (North Salt Lake area), has an increasing trend. The other three are in plateau and have no trend.

A new, public dashboard is available to explore statewide wastewater surveillance data. Visit <https://avrpublic.dhhs.utah.gov/uwss/>.

Influenza-Like Illness

Graph 1 displays the weekly percentage of outpatient visits due to influenza-like illness (ILI). For comparison, the dashed line shows the previous 5-year average (2018-2022) of ILI activity. This week's ILI rate was 2.8%.

Graph 1. Percent of Outpatient Visits due to Influenza-Like Illness, by Week, Davis County, Utah

School Absenteeism

Graph 2 displays the weekly percentage of elementary school absenteeism in Davis School District. For comparison, the dashed line shows the absenteeism rate of the previous 5 school years (school years beginning 2018-2022). This week's absenteeism rate was 7.5%.

Graph 2. Percentage of Elementary School Absenteeism, by Week, Davis School District, Utah

Emergency Department Visits

Graph 3 displays the rolling 7 day average of the percent of emergency department (ED) visits due to COVID-19, influenza, and respiratory syncytial virus (RSV). These data are obtained from syndromic surveillance and only consider the diagnosis discharge codes for each condition. Table 1 presents two data points for each virus: the current trend of ED visits (increasing, decreasing, or no change), and the percent of ED visits due to each during the currently reported week.

Graph 3. Percent of ED Visits due to COVID-19, Influenza, & RSV, Rolling 7-day Average, Davis County, Utah

Table 1: Recent Trends of ED Visits, Davis County, Utah, for Week Ending Dec 09, 2023

Virus	Trend	Percent of ED Visits
COVID-19	Plateau/no trend (last 14 days)	1.8 %
Influenza	Plateau/no trend (last 14 days)	1.8 %
RSV	Plateau/no trend (last 14 days)	0.5 %

Hospitalizations

Graph 4 displays the weekly number of hospitalizations due to COVID-19 and influenza.
